

# West Sacramento Flood Protection Program

Southport Sacramento River Early Implementation Project

## Southport Sacramento River Early Implementation Project

### LEVEE PROJECT WORKSHOP

Thursday, January 26, 6 to 8 p.m.

City of West Sacramento Community Center, Community Room

1075 West Capitol Avenue, West Sacramento

You are invited to learn about preliminary design alternatives of proposed levee improvements in the Southport area of West Sacramento.

WSAFCA has completed analyses needed to devise project alternatives that would correct known deficiencies in the Southport Sacramento River levee. The purpose of this workshop is to present preliminary design alternatives that solve all levee problems completely and as soon as possible. Preliminary design represents 15% of the complete design process. The WSAFCA Board of Directors will select a preferred design alternative during the Board's public meeting on February 9, and direct the project team to prepare 60% complete design for the levee project.

The West Sacramento Area Flood Control Agency (WSAFCA) Board of Directors will receive a presentation on preliminary design alternatives during a public meeting on January 12, in the City Council Chambers of West Sacramento City Hall, at 10:30 a.m. The Levee Project Workshop on January 26 is provided by WSAFCA to enable the public to meet with members of the project team and discuss the preliminary design alternatives, the latest information about levee deficiencies and ways to resolve levee deficiencies along the Sacramento River in Southport.

WSAFCA welcomes your questions about the Southport Sacramento River Early Implementation Project. The project team will make every effort to present responses to questions received in advance of the workshop. Please e-mail your questions to [westsacfloodprotection@gmail.com](mailto:westsacfloodprotection@gmail.com).

We hope you can attend this important workshop.

**Questions?** Please call Flood Protection Manager Michael Bessette at (916) 617-4850.
